

James Youngblood

✉ james@youngbloods.org  [soundeffects](https://github.com/soundeffects)

Software and Visualization Engineer

Education

B.S. in Computer Science, University of Utah Fall 2019 - Spring 2023

3.8 GPA, deans list, full-ride merit-based scholarship

Courses: Parallel Programming, Algorithms, Programming Languages, Intro to AI

M.S. in Computing: Visualization, University of Utah Fall 2023 - Fall 2025

3.95 GPA, deans list

Courses: Interactive Graphics, Data Visualization, Image Processing, Computer Vision

Employment

Teaching Assistant, University of Utah Fall 2020 - Spring 2024

Courses: Graphics, Algorithms, Parallel Programming, Computational Theory

Skills: Mentoring, course management, computer science fundamentals

Web Development Intern, Crescendo Technologies, Inc. Summer 2023

Browser automation and end-to-end tests for production web apps.

Skills: Playwright, Typescript, Javascript, React

CI/CD Intern, Verisage Custom Software Fall 2018

Updating Django templates and python packages.

Skills: Python, Django

Research

Digital Image Transformations Degrade Gaze Prediction Accuracy 2023 - 2025

Master's thesis on dataset quality issues and limitations for gaze prediction.

Skills: Computer vision, Python, Pytorch, image processing, statistics, technical writing

Projects

Visual demos of all my projects are at soundeffects.github.io/me

Prockit 2025

Skills:

Planets on wgpu 2024

Procedural earth-like planets, rendered in the browser.

Skills: Rust, WebGPU, WASM, procedural generation, rendering primitives

Interactive OpenGL Renderer 2022

Shadow mapping, texture render targets, environment map reflections, and more.

Skills: C++, OpenGL, interactive graphics, modern rendering

Scientific Visualizations 2024

Advanced visualizations for air vortices, maps, and other spatial data.

Skills: ParaView, multi-dimensional visualization
