

James Youngblood

✉ james@youngbloods.org  [soundeffects](https://github.com/soundeffects)

Software and visualization engineer

Education

M.S. in Computing: Visualization, University of Utah Aug 2023 - Dec 2025

3.95 GPA, dean's list

Courses: Interactive Graphics, Data Visualization, Image Processing, Computer Vision

B.S. in Computer Science, University of Utah Aug 2019 - May 2023

3.82 GPA, dean's list, full-ride merit-based scholarship

Courses: Parallel Programming, Algorithms, Programming Languages, Intro to AI

Employment

Teaching Assistant, University of Utah Aug 2020 - May 2024

Courses: Intro to Graphics, Algorithms, Parallel Programming, Computational Theory

Skills: mentorship, communication, management, collaboration, conflict resolution

Web Development Intern, Crescendo Technologies, Inc. Summer 2023

Browser automation and end-to-end tests for production web apps.

Skills: Playwright, Typescript, Javascript, React, full-stack

Deployment Intern, Verisage Custom Software Fall 2018

Updating Django templates and python packages.

Skills: Python, Django, backend systems

Research

"Digital Image Transformations Degrade Gaze Prediction Accuracy" 2023 - 2025

Master's thesis on dataset limitations for gaze prediction machine learning models.

Skills: Computer vision, Python, Pytorch, statistics, technical writing

Projects

All of my projects are at soundeffects.github.io/me or [github](https://github.com).

Prockit 2026

Framework for building easy, performant, and modular procedural content generators.

Skills: Rust, Bevy, systems design, developer tools, multi-threading

Scientific Visualizations, Coursework 2024

Advanced visualizations for air vortices, maps, and other spatial data.

Skills: ParaView, data visualization, high-dimensional data

Planets on wgpu 2023

Generated earth-like planets, rendered and animated in the browser.

Skills: Rust, WebAssembly, WebGPU, procedural generation, rendering techniques

Interactive OpenGL Renderer 2023

Shadow mapping, texture render targets, environment map reflections, and more.

Skills: C++, OpenGL, GLSL, rendering techniques
